-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 3, 15, 16, 28, 29, 41, 42, drawn to a method, system, article of manufacture, and command data structure to perform a clean operation using a rule table for storing rule definition and rule table column parameter in rule definition to identify the columns in rule table, classified in class 707, subclass 102.
- II. Claims 6, 19, 32 and 45, drawn to a method, system, article of manufacture, and command data structure to perform a clean operation using searching and sorting to match a find criteria with input data column, classified in class 707, subclass 3.
- III. Claims 7, 20, 33 and 46, drawn to a method, system, article of manufacture, and command data structure to perform a clean operation using a plurality of rules with different rule types, classified in class 707, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, Group I is drawn a method, system, article of manufacture, and command data structure to perform a clean operation using a rule

table for storing rule definition and rule table column parameter in rule definition to identify the columns in rule table, Group II is drawn to a method, system, article of manufacture, and command data structure to perform a clean operation using searching and sorting to match a find criteria with input data column, Group III is drawn to a method, system, article of manufacture, and command data structure to perform a clean operation using a plurality of rules with different rule types. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CR 1.48(b) and by the fee required under 37 CFR 1.17(i).
